CHANGES TO THE OPERABLE UNIT (OU) 2 SURFICIAL SOIL WORK PLAN (TM-7) - WSB-229-93

As we have discussed and informally presented to the Agencies, several sampling locations were moved from the proposed sampling grid proposed in Technical Memorandum No. 7 (TM-7). Following are the changes and the reason for each change:

TM-7 Location	Actual Location	Reason
1637	1629	Moved the bias sample location to obtain surficial soil data for an Individual Hazardous Substance Site (IHSS) that changed location due to the 1992 Historical Release Report.
20	24	Moved random sample location north and slightly east to avoid a paved area and a parking lot.
563	558	Moved random sample location north to avoid a fence and gravel road.
1885	1880	Moved random sample location north to avoid Pond C-2.

In addition, a bulk density sample could not be obtained from sample location 8157 due to the presence of large cobbles and boulders. The bulk density sample was then taken at location 8134.
